1. INTRODUCTION

Decentralized finance, better known as DeFi, is part of a system whereby financial products are made available on a public blockchain network, making them open, without centralized custody, and available for anyone to use.

Multiple technologies and protocols are used to achieve the goal of decentralization. For example, a decentralized system may consist of a combination of open source, Blockchain, and software technologies.

It is an emerging field that allows users to bypass intermediaries and make financial transactions directly with each other. Currently, it is gaining ground as an alternative to traditional financial services.

DeFi already offers virtually the same services as traditional banks and centralized financial institutions. In addition, every day they launch new products and options to make transactions.

They allow users to use cryptocurrencies in most services, unlike traditional banks, whose services require government-issued fiat currencies.

They use smart contracts, also called smart contracts.

These transactions are protected, in turn, by blockchain technology.

Most DeFi products do not take custody of your funds, which allows you to maintain control of your assets.

With DeFi, you access your funds or assets through a secure digital wallet.

2. BOTOPIA FINANCE LTD.

Botopia.finance is a decentralized finance (DeFi) FinTech that facilitates access to profitable passive income through the use of artificial intelligence operating on our customer service platform.

Technology finance company based in Dubai, United Arab Emirates. Botopia Finance Ltd.

A smart investment service that changes the way people understand and manage their finances, allowing them to increase their earning capacity.

Our proprietary software is the foundation of our customer service and decision-making platform.

Automated AI that in real time analyzes more than 300 pairs for selection while analyzing multiple indicators and the crypto assets with the highest volatility, volume and profitability in the market.

Thanks to this technology we are able to foresee the evolution of prices in the market and make the most convenient investment, at the right time, thus maximizing return.

Botopia.Finance

3. MISSION, VISION AND VALUES

Facilitate access to profitable passive income for anyone regardless of capital or location.

Offer easy access to the cryptoactive market through our investment platform without the client requiring prior experience in the financial sector markets, where they only have to choose what capital to invest, what interest to earn and how often.

Balance the balance of equal opportunities in the world of finance and investment.

Disruption in the investment market with returns higher than the of your competitors.

Botopia.Finance

4. WHAT DO WE OFFER?

Botopia offers a tiered user level system that allows both individuals and institutions to participate in our project, regardless of their financial capacity or prior investment knowledge.

Our company philosophy is to offer easy access to the cryptoactive market through our investment platform without the user requiring previous experience in the financial markets.

The user only has to choose what capital to invest, what interest to earn and how often*.

*minimum 2 weeks (60% APR).

TRIPLE TIERED REWARD SYSTEM

Botopia offers a unique triple reward system in the crypto asset market made up of:

PASSIVE RETURNS using our automated investment platform:

Up to 60% APR

Up to 82.12% APY

-Possibility of capitalizing every 8 hours.

The compound capital cannot exceed the maximum investment allowed in each TIER.

If this condition is met, the excess repayment will be perceived as capital gains and will not be added to the compound interest until the TIER levels are increased.

Botopia.Finance

PASSIVE REFLECTIONS of the smart contract of our token (BTOP) for access to the investment platform (2% purchases and sales).

There is no need to lock the tokens to prevent such reflections from occurring, but it is necessary to maintain the level equal to or higher than that purchased in the initial investment.

In the case of reducing the level of the level, if there is an ongoing investment, the commission level will be increased to the current level, the maximum capital allowed will be reduced (if applicable) leaving the remaining capital in surplus and outside the annual APR.

REFERRAL PROGRAM with 0.1% profit for each referral.

A new user who accesses the platform with a valid referral code will benefit from a commission reduction of 0.1% when withdrawing profits.

A user who shares their unique referral code will earn 0.1% of the profit earned from their referrals.

This value can be consulted online on our investment platform and can be withdrawn at any time by the user.

5.BTOP TOKEN

The project token will be a utility token called BTOP, developed on the BNB Smart Chain (BSC) BEP-20 protocol, which will be made up of a maximum of 120 million token units.

Binance Smart Chain (BSC) is the blockchain that works in parallel to Binance Chain.

In this case, BSC is oriented towards smart contracts, allowing it to operate on decentralized applications on a platform without permissions.

Binance Smart Chain uses a BEP-20 token.
